**Association for Women in Technology Presents Our
Quarterly Interactive Technology Forum
Mobility is Changing the Way We Do Business**

IRVINE, Ca, May 17, 2010 — Mobility offers easy-to-use services to people who no longer use their PCs as the primary way of accessing the Internet, and instead use their mobile devices for managing large forces of enterprise field workers, conducting financial transactions, and for entertainment, shopping, and other activities. Mobile Technology is currently the fastest growing sector in telecommunications. It covers the spectrum from personal use to business use and has yielded specific applications such as those on the iPhone. Come join us as we explore how mobility is being used today and how it's expected to be used in the future. The Panelists are:

Tim Howell *Director of Mobility, [Teleproviders](#),*

Kelly Owens St. Julian *Mobility Consultant - former Chief Service Officer for [Boost Mobile](#)*

Doreen Wakefield - *President & CEO, [Plan b Solutions](#)*

Steve Gladstone - *Director, Applications and Services, [Panasonic Avionics Corporation](#)*

Kim Beckhart *Cisco Systems/Web Ex*

This workshop is for ALL IT professionals, including men and women. Complimentary hors d'oeuvres & beverages will be served. Parking is free for AWT members and guests.
